---

I'll be out a few days as well for Spring Break next week. I've attached the Ag Street Reuse plan that we completed for Ag Street Landfill in New Orleans last year. Also, there's one we did for Bandera Road in 2010. Both different sites, different reuse objectives, and different products. But they'll give you a flavor for the content of reuse assessment and reuse planning. Also, there's a fact sheet from the nation Reuse program describing reuse planning and the resources we have available to provide the stakeholders. Feel free to share these with the TCEQ folk you mentioned prior to us talking to them.

If you have a short write-up describing the site, that would be very helpful to me when I ask HQs for the technical assistance. If not, I'll pull it from the pol reps.

Let me know if I can answer any additional questions before we talk to the State. I'd like to schedule a call with TCEQ for the week after Spring Break if that's ok – Monday or Tuesday?

Thanks,

Casey

**Subject:** Discussion on potential Superfund Reuse Support at CES

I spoke with Gary this afternoon and he agreed that there is a good opportunity for R6 to utilize Superfund Reuse support tools and technical assistance at the CES site in Houston.

Since the site will soon be entering TCEQ's VCP, Gary requested that we speak with Terry Andrews and Monica Harris at TCEQ about the reuse tools available for evaluating future uses for the site. It's likely an ideal time to begin an structured dialogue with site stakeholders as decisions now on the cleanup could affect (or limit) future uses.

Are you both available to talk with Terry and Monica early next week – perhaps Monday, 3/9?

Thanks,

Casey
